Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Continued Examination Under 37 CAR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 15, 2002 has been entered.

REASONS FOR ALLOWANCE

2. The present invention is related to a method of parallel analysis of biological specimens, comprising: a) obtaining a plurality of donor specimens; b) placing each donor specimen in an assigned location in a recipient array; c) obtaining a plurality of substantial copies of the recipient array in a manner that each substantial copy contains a plurality of donor specimens that maintain their locations; d) performing a biological analysis of each substantial copy; and e) comparing the results of the biological analysis in corresponding assigned locations of different substantial copies to determine if there are correlations between the results of the biological analysis at each assigned location. Although, Stapleton et al. (U.S. Patent 6,103,192) (August 15, 2000) teach a method of parallel analysis of biological specimens, comprising: a) obtaining a plurality of donor specimens; b) placing each donor specimen in an assigned location in a recipient array; Stapleton

Art Unit: 1634

et al do not teach the method of obtaining a plurality of substantial copies of the recipient array in a manner that each substantial copy contains a plurality of donor specimens that maintain their locations; and performing a biological analysis of each substantial copy, and comparing the results of the biological analysis in corresponding assigned locations of different substantial copies to determine if there are correlations between the results of the biological analysis at each assigned location

In view of the absence of either teaching or suggestion of such method of obtaining a plurality of substantial copies of the recipient array in a manner that each substantial copy contains a plurality of donor specimens that maintain their locations, performing a biological analysis of each substantial copy; and comparing the results of the biological analysis in corresponding assigned locations of different substantial copies to determine if there are correlations between the results of the biological analysis at each assigned location, the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
